

--- PRESS RELEASE ---

--- FOR IMMEDIATE DISTRIBUTION ---

New Interface Exports From VISI MOULD Into WorkPLAN Solutions

A new interface now links two leading software brands, limiting the risk of data input errors, guaranteeing reliability and accuracy when information is passed between them with just a few clicks.

This allows bills of materials from VISI Mould to be imported directly into WorkPLAN Solutions, ensuring that WorkPLAN can produce accurate, competitive quotes. WorkPLAN configures an import model in correlation with the file exported from VISI Mould, automatically importing the bill of materials.

The interface means users save time and can give a quicker response to their customers, especially regarding raw materials, standard elements and stock supply management. Projects and their costs can be fully controlled thanks to the import of the complete bill of materials tree structure.

WorkPLAN joined the Vero Software Group earlier this year. WorkPLAN Business Manager Violette Teofilovic says: "This new interface demonstrates Vero's long term, strategic investment in developing WorkPLAN Solutions. Ongoing customer satisfaction remains our main priority, so we'll continue to provide solutions adapted to market requirements, which improve manufacturers' business efficiency, ensuring they stay competitive."

Data from any CAD application can be imported into WorkPLAN. "The modules are especially adapted for custom manufacturing for a wide range of industries including aeronautics, nuclear, mould making, precision parts design, rapid prototyping, metal constructions and specialised machinery. Its high flexibility allows users to implement only the modules which are necessary for their specific activity."

For its part, VISI Mould is capable of exporting the required data in csv format. With a full range of CAD interfaces, it can directly open files from applications such as PARASOLID®, IGES®, CATIA® V4 & V5, PRO-E® and STEP®.

“VISI Mould is a true hybrid modeler of the new ‘Direct 3D Modeling’ generation, allowing rapid geometry definition and capture, without having to consider constraints and design intent.”

ENDS

Headquartered in England, Vero Software designs, develops, and supplies CAD/CAM/CAE software radically enhancing the efficiency of design and manufacturing processes, providing its customers with exceptional value through high productivity gains and significantly reducing time to market. The company's world-renowned brands include Alphacam, Cabinet Vision, Edgecam, Machining STRATEGIST, PEPS, Radan, SMIRT, SURFCAM, WorkNC and VISI, along with the production control MRP system Javelin. Despite the diversity of application, these solutions have one thing in common: they all address the rising challenges of achieving manufacturing efficiencies and bring huge value to the operations in which they are deployed.

Vero sells and supports its range of products through its direct offices in the UK, Italy, France, Germany, Netherlands, USA, Brazil, India, Japan, Korea and China, and through a comprehensive global reseller network across more than 45 countries.
